Toyota Motor Corporation warning concerning correct specifications for UN and humanitarian organizations working in development countries

Dear Toyota Customer,

We, Toyota Motor Corporation (TMC) confirm that Toyota Motor Europe NV/SA (TME) is our subsidiary company in Europe. TME has been consigned with the sale of Toyota stock vehicles and spare parts to the UN and International Aid Organizations through our humanitarian vehicle stock, which is based in Gibraltar.

Toyota Gibraltar Stockholdings Ltd (TGS) has been appointed as independent and exclusive agent by TME for the sale of these stock vehicles. Though this procedure Toyota assures that only approved vehicle specifications are imported into the various project countries.

All vehicles sales from the Gibraltar stock are reported continuously to TMC in order to allow Toyota to arrange the vehicle warranty in end destination with the local Toyota distributor and to assure that only vehicles that can be maintained in the project country are imported.

In this respect TGS stock only "General" specification vehicles as these are the vehicles which are suitable for use in developing countries.

It should be noted that "Gulf", "GCC" or "V" spec vehicles (which typically carry the letter V at the end of the model code) are NOT designed for use in developing countries and will not be supported by Toyota's worldwide warranty cover.

We are pleased to endorse TGS as the official supplier of ex stock Toyota vehicles and spare parts to the Aid and Humanitarian agencies working in projects worldwide.

Your sincerely

Shuji Fujisawa,
Group Manager, UN & Fleet Sales Group
Sales and Marketing Dept 2,
Africa Division
